

Go IT Services delivers high quality, information technology solutions to government customers at every level. We do this by deploying skilled resources, applying structured methodology, and assigning certified, professional project managers in every engagement.

The Texas Department of Information Resources (Texas DIR) offers **Deliverables-Based IT Services** (DBITS) to Texas governmental and public educational entities through DIR's Go DIRect Program.

Go IT Services is an approved Texas DIR DBITS vendor. We bring extensive **government experience** and we are authorized to provide Texas DIR customers with services in the categories listed below.

OUR SERVICES

APPLICATION DEVELOPMENT

Application Development includes development of new applications which may be main-frame, server, network-based, web-based or a combination. The requirements for new applications may require interfaces to existing applications.

APPLICATION MAINTENANCE & SUPPORT

Application Maintenance and Support includes the skills and requirements for supporting application systems, including troubleshooting, modifying, maintaining and enhancing legacy systems. Application Maintenance and Support also applies to applications running in a production environment.

TECHNOLOGY UPGRADE/MIGRATION & TRANSFORMATION

Technology Upgrade/Migration may be required to increase business functionality, re-engineer a business function, keep current with vendor upgrades or when upgrading existing technology. Technology Transformation may be accomplished by converting/migrating legacy applications to new technology either with or without new business functionality or it may include introducing new technology into the enterprise. Technology Upgrade/Migration may also include providing website content accessibility compliance.

PROJECT MANAGEMENT

Project Management services include performance of any or all of the project management processes. Our project managers are PMP® certified through the Project Management Institute. As such, they are trained and qualified using a variety of industry-standard tools and techniques. Our Project Management service includes Scope Management, Schedule Management, Financial Management, Quality Management, Communication Management, Project Change Management, and Risk Management. Additionally, we create Test Acceptance Plans that clearly define project success criteria in order to ensure the solution meets business requirements.
