

K-12 FOCUS

Go IT Services specializes in helping school districts implement and maintain K-12 information systems and infrastructure.

Our team brings knowledge and expertise in the infrastructure, processes, and data flow critical to the implementation and day-to-day operation of school district systems.

K-12 IMPLEMENTATION SERVICES

Go IT Services staff understand and have hands on experience implementing Student Information Systems (SIS), Instructional Management Systems (IMS), Enterprise Resource Planning Systems (ERP) for Finance and HR, and Staff Development Systems. Specifically, our team brings knowledge and expertise in the following functional areas:

STUDENT INFORMATION SYSTEMS

- ✓ Enrollment
- ✓ Gradebook
- ✓ Program Tracking
- ✓ Parent Portal
- ✓ Food
- ✓ Transportation
- ✓ Scheduling
- ✓ Attendance
- ✓ Assessments
- ✓ Discipline
- ✓ Health
- ✓ PEIMS Reporting

FINANCE & HR SYSTEMS

- ✓ Chart of Accounts
- ✓ Requisitions
- ✓ Accounts Payable
- ✓ Budgets
- ✓ Time Keeping
- ✓ Position Control
- ✓ General Ledger
- ✓ Purchase Orders
- ✓ Grants
- ✓ General Billing
- ✓ Payroll
- ✓ Employee Self Service

Project Management

Our project managers help your district organize, plan, and execute its project-related activities and manage interactions with the vendor ensuring deliverables meet the district’s functional requirements, quality standards, budget, and schedule.

System & Data Analysis

Our system analysts help the district supplement and/or support its own IT personnel with various technical tasks required for implementations. These may include sourcing and formatting of historical data for conversion into a new SIS or ERP, setup of data exchanges with other systems, as well as software installation and configuration, support and maintenance.

Web Development

Go IT Services provides professional web development and redesign services based on a variety of content management engines (CMS). Using a CMS improves the district’s web presence, enhance visitor experience, and streamline changes through easy, workflow-based

processes that can be performed by non technical staff. Our web solutions offer unrivaled accessibility with full compliance to W3C standards.

Business Solutions

We intimately understand enterprise solutions and know how to implement them in a K-12 environment. Our team includes expert professionals that specialize in implementing productivity and collaboration solutions from Exchange server and Outlook Web Access, to Office and Windows Sharepoint Services, and Document Imaging and Management.

Network & System Management

We offer design and management services for your critical network infrastructure including implementation of Active Directory services, upgrade of critical software and hardware infrastructure, as well as monitoring and tuning your network for optimal operations. We also offer support services that include on-site as well as remote diagnosis and resolution of critical issues in applications, systems, networks, and databases.
